Homo sapiens unadorned:

June 6th-August 1st

Call for entries: Celebrating the human nude

The guidelines are really open as to the meaning of nude. The work should reflect interesting, beautiful or thoughtful and artistic nude work. I would also love imagery depicting aging and less than perfect bodies. Not interested in hard erotic or graphic hard imagery.

NUDE IS NOT LEWD

Nudity, especially in the U.S. is associated with emotions like disgust and shame. Many societies have proven that this is simply not true: nudity is a natural and normal state of being that should be embraced and supported. Throughout history man has adorned himself for protection, identity, and belonging. Having a nude exhibition in a jewelry store will be a great juxtaposition of themes. Culturally jewelry has been worn for enhancing beauty, portable wealth, and tokens of love and spirituality. Stripping the human body of clothing and adornments brings us to the core of who we are in relationship to nature.

I am looking for Nudity depicted in all forms of art: photography, painting, poetry, sculpture, and stage, political.

Show opens June 6th: opening reception 6-9 Clothing optional
